# Offset Printing

## PRESSROOM

Selected to provide the efficiency and quality demanded by our clients, BOND's industry leading equipment can meet most challenges.

Our pressroom showcases four and six colour Heidelberg's capable of unparalleled performance including pinpoint precision for true colours and detailed images. A Ryobi two-colour machine completes our high performance presses for two colour orders requiring heavy ink coverage and dot to dot registration.

Short to medium press runs are easily produced on our two colour Heidelberg QM-46s which output consistent even tones, bold blacks and crisp colours over the length of the run. They are chosen for their reliability, flexibility and quick start-and-go capabilities, ensuring fast production and turn-around.

Brochures, Rack Cards, Newsletters, Magazines, Stationery, Business Cards, Folders and Direct Mail are our specialty. We can put ink on paper from 4 1/4" x 5 1/2" to 20" x 29" and everything in between.

## ADVANTAGES OF OFFSET:

- the broadest range of colour choices; Pantones, fluorescents, metallics, foils and varnishes
- the most accurate colour re-production and consistency
- the largest selection of paper weights, sizes and textures
- the most cost effective for long runs
- adjusts to ink density from fine screens to large solids
